<b>Experiment</b>	9&10
<b>Aim</b>	Capstone project with database connectivity - Sneakers E-commerce (Sneaker Store) with firebase connectivity
<b>Objective</b>	<ul style="list-style-type: none"><li><input type="checkbox"/> Develop a modern and visually appealing e-commerce app for sneakers using Flutter.</li><li><input type="checkbox"/> Ensure cross-platform compatibility (Android, iOS, Web) with responsive UI.</li><li><input type="checkbox"/> Implement Firebase Authentication for secure user login/signup.</li><li><input type="checkbox"/> Use Cloud Firestore to manage sneaker product listings, categories, and user data in real-time.</li></ul>
<b>Name</b>	Panchangni Dhangar Shreyas Gaikwad Sanjana Palkar
<b>UCID</b>	2024510014 2024510019 2024510040
<b>Class</b>	FYMCA
<b>Batch</b>	D
<b>Date of Submission</b>	5/5/2025

<b>Technology used</b>	<b>Flutter, Vs Code, Firebase</b>
<b>Task</b>	<ul style="list-style-type: none"><li><input type="checkbox"/> Set up Flutter project and integrate Firebase (Auth, Firestore, Storage, FCM).</li><li><input type="checkbox"/> Implement user login/signup with Firebase Authentication.</li><li><input type="checkbox"/> Design UI for product listing, details, cart, and checkout.</li><li><input type="checkbox"/> Fetch sneaker data from Firestore and display it.</li></ul>
<b>Code with proper label</b>	<pre>main.dart  import 'package:firebase_core/firebase_core.dart'; import 'package:flutter/material.dart'; import 'package:flutter_screenutil/flutter_screenutil.dart'; import 'package:provider/provider.dart'; import 'package:hive_flutter/hive_flutter.dart'; import 'package:sneaker_app/controllers/mainscreen_provider.dart'; import 'package:sneaker_app/controllers/product_provider.dart'; import 'package:sneaker_app/views/pages/cart_page.dart'; import 'package:sneaker_app/views/pages/favorites.dart'; import 'package:sneaker_app/views/pages/login_signup_page.dart'; import 'package:sneaker_app/views/pages/splash_screen.dart'; import 'package:firebase_options.dart'; import 'package:flutter/foundation.dart' show kIsWeb;  // PAGES import '../views/pages/mainscreen.dart'; import 'controllers/cart_provider.dart'; import 'controllers/favorites_provider.dart';  void main() async {   WidgetsFlutterBinding.ensureInitialized();   try {</pre>

<b>Conclusion</b>	<p>This Flutter project demonstrates the integration of Firebase for backend services and Hive for local data storage, making it a practical example of building a cross-platform eCommerce app. It uses the Provider package for state management, ensuring scalable and reactive UI updates across features like the main screen navigation, product listings, cart, and favorites. The app initializes Firebase differently for web and mobile using platform-aware logic, showing how to write adaptable code. Hive is used to persist cart and favorite items locally, enabling offline functionality. Additionally, flutter_screenutil ensures that the UI is responsive across different screen sizes. Navigation is handled through named routes, with a clear structure from splash to login/signup and main pages. Overall, the project covers essential concepts like authentication, state management, responsive design, and local data storage in a real-world app context.</p>
